

Virtual Stewardship and ILÚM Insight:

“The real time alerts are probably one of the most valuable advantages ILÚM has over other decision support tools.”

by the numbers

Most hospitals have experienced a dramatic increase in meaningful interventions using ILÚM software. One hospital saw a **300% INCREASE** in pharmacy interventions

Approximately an **18% decline on length of antibiotic duration** ↓

Approximately **20% reduction** in overall antibiotic usage 

After using ILÚM technologies, hospitals were able to **achieve time to optimal therapy 1 day faster**

Improve Clinician Satisfaction

- Significant Time Savings
- Relevant Data Access
- ID Authorization
- Decreased Alert Fatigue

Positive Financial Performance

- Reduce length of stay in hospital
- Decreased antibiotic cost
- Reduce number of hospital acquired infections
- Prevention and risk mitigation
